Sr.	Practical
Lab-1	**Demonstration of Unix Commands:** Perform the following Unix Commands: cd, ls, man, echo, cal, date, clear, cat, who, whoami, uname, passwd
Lab-2	**Demonstration of Unix Commands:** Perform the following Unix Commands: mkdir, rmdir, cp, mv, rm, cut, paste,cmp, comm, diff, chmod, chown, chgrp, file, sleep
Lab-3	**Demonstration of Unix Commands:** Perform the following Unix Commands: kill, ps, wc, ln , nl, head, tail, sort, find, uniq, tr, history, pipe
Lab-4	**Shell Scripts using Basic operators** **Part: A** Write a Shell Script: 1. To print "Hello Linux". 2. To print your address. 3. To print the addition of two numbers. 4. To print the area of a circle. 5. To calculate simple interest. **Part: B** Write a Shell Script: 1. To swap two numbers
Lab-5	**Shell Scripts using If and If ..else statement** **Part: A** Write a Shell Script: 1. To check whether a number is greater than 10 or not. 2. To find a largest number from 2 numbers. 3. To check whether person is eligible to vote. (age>18). 4. To find a largest number from 3 numbers. **Part: B** Write a Shell Script: 1. To check whether the given no is ODD or EVEN. 2. To check whether the given no is POSITIVE or NEGATIVE. 3. To print day name based on day number. [Sunday to Saturday] **Part: C** Write a Shell Script: 1. To check whether given no is divisible by 5 or not. 2. To accept two integers and check whether they are equal or not if both numbers are not equal then find the largest number from the two numbers and check whether the largest number is divisible by 5 or 7 or both.
Lab-6	**Implementation of nested if statement and if-else-if ladder using shell script** **Part: A** Write a Shell Script: 1. To find the largest number from 3 numbers. 2. To check given year is a Leap year or not. [If a year can be divisible by 4 but not divisible by 100 then it is leap year but if it is divisible by 400 then it is leap year] 3. Write a shell script to generate a mark sheet of a student. Take 3 subjects, calculate, and display the

	total marks, percentage, and Class obtained by the student. **Part: B** Write a Shell Script: 1. To print the day name based on the day number. [Sunday to Saturday] **Part: C** Write a Shell Script: 1. To enter basic salary of an employee and calculate Gross salary according to given conditions Basic Salary >= 10000: DA = 80% of basic salary, HRA = 20% of basic salary + DA Basic Salary >= 20000: DA = 90% of basic salary, HRA = 25% of basic salary + DA Basic Salary >= 30000: DA = 95% of basic salary, HRA = 30% of basic salary + DA. 2. To accept two integers and check whether they are equal or not if both numbers are not equal then find the largest number from the two numbers.
Lab-7	**Implementation of WHILE Loop using shell script** **Part: A** Write a Shell Script: 1. To print "Hello Linux" 5 times. 2. To print 1 to 10. 3. To print 1 to 'n' numbers. 4. To find the factorial of given number n. **Part: B** Write a Shell Script: 1. To find the Sum and average of 'n' numbers. 2. To print odd numbers between 1 to n. **Part: C** Write a Shell Script: 1. To check whether a given number is palindrome or not.
Lab-8	**Implementation of FOR Loop using shell script** **Part: A** Write a Shell Script: 1. To check whether a given number is prime or not. 2. To find the first n Fibonacci numbers like 0 1, 1, 2, 3, 5, 13, … 3. To find the value of one number raised to the power of another. **Part: B** Write a Shell Script: 1. To find the factorial of the given number. 2. To find factors of the given number. **Part: C** Write a Shell Script: 1. To display the multiplication table of the given number
Lab-9	**Implementation of SWITCH CASE using shell script** **Part: A** Write a Shell Script: 1. To read weekday number and print weekday name using switch statement. 2. To read gender (M/F) and print the corresponding gender using switch statement. **Part: B** Write a Shell Script:

	1. Check whether a character is a VOWEL or CONSONANT using switch statement. 2. For basic calculator **Part: C** Write a Shell Script: 1. To find a number of days in a month using switch statement.
Lab-10	Perform the FCFS (First Come First Serve) and SJF (Shortest Job First) Scheduling Algorithm for the following.
Lab-11	Perform the SRTN and Round Robin Scheduling Algorithm for the following.
Lab-12	Perform the Priority Scheduling Algorithm for the following.
Lab-13	Solve the given Problem Using Memory allocation Strategies: First fit, Next fit, Best fit and Worst fit for allocation of memory
Lab-14	Solve the given Problem using Page Replacement Algorithm.
Lab-15	Solve problem using FCFS , SSTF, SCAN,C-SCAN, LOOK and C- LOOK Disk Scheduling Algorithm.
